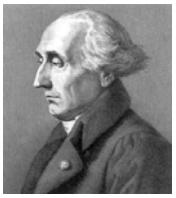
Genealogy Gerth Stølting Brodal



Joseph Louis Lagrange
(1736 – 1813)

Jean–Baptiste Joseph Fourier
(1768 – 1830)
Ecole Normale

Siméon Denis Poisson
(1781 – 1840)
Ecole Polytechnique

Gustav Peter Lejeune Dirichlet
Universität Köln – 1827

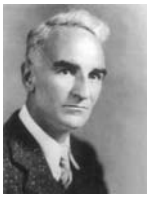
Martin Ohm
De elevatione serierum infinitarum secundi ordinis ad potestatem exponentis indeterminati
Friedrich–Alexander–Universität Erlangen–Nürnberg – 1811

Rudolf Otto Sigismund Lipschitz
Determinatio status magnetici viribus inducentibus commoti in ellipsoide
Universität Berlin – 1853

Julius Plücker
Universität Marburg – 1823

C. Felix (Christian) Klein
Über die Transformation der allgemeinen Gleichung des zweiten Grades zwischen Linien–Koordinaten auf eine kanonische Form
Rheinische Friedrich–Wilhelms–Universität Bonn – 1868

Frank Nelson Cole
A Contribution to the Theory of the General Equation of the Sixth Degree
Harvard University – 1886



Eric Temple Bell
The Cyclotomic Quinary Quintic
Columbia University – 1912

Morgan Ward
The Foundations of General Arithmetic
California Institute of Technology – 1928

Robert Palmer Dilworth
The Structure and Arithmetical Theory of Non–Commutative Residuated Lattices
California Institute of Technology – 1939

Juris Hartmanis
Some Embedding Theorems for Lattices
California Institute of Technology – 1955

Erik Meineche Schmidt
Succinctness of Descriptions of Context–Free, Regular and Finite Languages
Cornell University – 1978

Gerth Stølting Brodal
Worst Case Efficient Data Structures
Aarhus University – 1997
