Programme

15.15

Welcome and introduction by Professor Ivan Damgård

15.20

Lecture by Professor Jesper Buus Nielsen

16.00

Reception

Appetizer

It is well known that if you want to prevent aliens (or just other people) from reading your thoughts, you can simply wear a tinfoil hat. However, as you walk down Strøget in downtown Aarhus, proudly sporting your tinfoil hat, what and whom you are *looking at* can still reveal lot about what is in your head. You can try sunglasses, but now and then you will want to turn your head. Is there a way to fully “encrypt” where you are looking?

The lecture will be in English

Kind regards,

Kaj Grønbæk
Head of Department, Professor
