GSST §11.1

A PhD thesis may be formed as ① a **monograph**, or it may include a ② **number of manuscripts** or papers in different stages of completion that are related to the topic of the PhD project. If the thesis is composed mainly of manuscripts or papers, the PhD student must include a section encompassing the following elements:

- A brief description of the proposed **research questions** in the papers
- A short presentation of the **results** and a brief assessment of the applied **methodologies**
- A critical **review** in which the PhD student relates his or her own work to the most **state-of-the-art** work within the field. The PhD student must also demonstrate that he or she has an up-to-date knowledge hereof and is able to put this knowledge into a broader perspective.

The **review section** may resemble a major review article.

- 1) What constitutes a good thesis ?
- 2) What constitutes a good defense talk ?

Who is the target group for your thesis? Good title? Good first line, paragraph, section? What is a good introduction? What is a good motivation for the research? 2-column pages? Unify layout? Unify notation across chapters? Unify layout across chapters? Running example throughout thesis? Is there a good template for a thesis (or at least for each CS topic)? Use terms before formal definitions? Should all proves be given in full detail? Should a thesis have a table of notations? Include full papers, or only actual contributions by PhD student? Coherent vs. many papers? Level of detail in writing? How polished should the thesis be? ...
