STRUCTURE OF MASTER’S DEGREE PROGRAM

Specialization:
- Two 30 ECTS specializations

Elective:
- Recommendation is a 3rd specialization.
- A small number of elective courses in computer science is offered in addition to specializations. Project work (partly) is also a possibility.
- Elective courses may be supportive rather than core computer science, e.g. extra mathematics courses.
- There may be requirements for the composition of the study program in connection with possible admission. In this case mandatory courses replace the elective courses (partly).

Thesis: Written within the area of specialization 1 or 2

FREMDRIFTSREFORM ("STUDY PROGRESS REFORM")

- If you follow the recommended program of study (30 ECTS per semester), take courses in the correct order (the Box Diagrams) and pass all courses at the ordinary exam or at the first scheduled re-exam then you need not worry about the study progress reform.

- If you fall behind or do not pass a course at the latest by the first reexamination then contact us for advice and guidance on your individual study program.

- If you ignore this advice and believe that “it will be fine”, it may have serious consequences!

- If you do not complete your master’s program within six months after the prescribed time you are automatically signed out of the study program / out of the university [https://studerende.au.dk/en/studies/subject-portals/computer-science/student-counselling/maximum-duration-of-study/](https://studerende.au.dk/en/studies/subject-portals/computer-science/student-counselling/maximum-duration-of-study/).

- If you fail an exam in an elective course, then that course has become mandatory! If you have made an erroneous choice of an elective course, please contact us for guidance immediately!
