STRUCTURE OF MASTER’S DEGREE PROGRAM

Specialization:
- Two 30 ECTS specializations

Elective:
- Recommendation is a 3rd specialization.
- A small number of elective courses in computer science is offered in addition to specializations. Project work (partly) is also a possibility.
- Elective courses may be supportive rather than core computer science, e.g. extra mathematics courses.
- There may be requirements for the composition of the study program in connection with possible admission. In this case mandatory courses replace the elective courses (partly).

Thesis: Written within the area of specialization 1 or 2

**MSc program with study abroad semester:**

- Suffices to have a single specialization
- A specialization may be finished abroad by taking a course within the relevant area
- Recommendation: start by having two specializations, so you can finish these if you do not succeed in going abroad
CURRENT SPECIALIZATIONS

Specializations are taught by active researchers in the corresponding field.

Current offerings

- Algorithmics (30 ECTS)
- Cryptology (30 ECTS)
- Data-Intensive Systems (30 ECTS)
- Human-computer Interaction (30 ECTS)
- Programming Languages (30 ECTS)
- Ubiquitous Computing and Interaction (30 ECTS)
- Bioinformatics (30 ECTS)

Each research group presents current research at the annual Computer Science Day, see https://cs.au.dk/news-events/cs-colloquium/.

We expect to offer more specializations from Autumn 2021.
Details will be available around April 2021.
